# TRANSPORTATION POOLED FUND PROGRAM QUARTERLY PROGRESS REPORT

Lead Agency (FHWA or State DOT): <u>IOWA DOT</u>			
INSTRUCTIONS:  Project Managers and/or research project investigators should complete a quarterly progress report for each calendar quarter during which the projects are active. Please provide a project schedule status of the research activities tied to each task that is defined in the proposal; a percentage completion of each task; a concise discussion (2 or 3 sentences) of the current status, including accomplishments and problems encountered, if any. List all tasks, even if no work was done during this period.			
Transportation Pooled Fund Program Project # TPF-5(219)		Transportation Pooled Fund Program - Report Period: Quarter 1 (January 1 – March 31, 2013) Quarter 2 (April 1 – June 30, 2013)  X Quarter 3 (July 1 – September 30, 2013) Quarter 4 (October 4 – December 31, 2013)	
<b>Project Title:</b> Development of a Structural Health Monitoring System to Evaluate Structural Capacity and Estimate Remaining Service Life for Bridges			
Project Manager: Ahmad Abu-Hawash	Phone: E-mail: 515-239-1393 ahmad.abu-hawash@dot.iowa.gov		
Project Investigator: Brent Phares	Phone: E-mail: 515-294-5879 bphares@iastate.edu		
Lead Agency Project ID: RT 329	Other Project ID (i.e., contract #): Addendum 367		Project Start Date: 3/01/10
Original Project End Date: 2/28/15	Current Project End Date: 6/30/16		Number of Extensions:
Project schedule status:  X On schedule □ On revised schedule □ Ahead of schedule □ Behind schedule  Overall Project Statistics:			
Total Project Budget	Total Cost	t to Date for Project	Total Percentage of Work Completed
\$809,741	\$268,959.85		43%
Quarterly Project Statistics:			

**Total Amount of Funds** 

**Expended This Quarter** 

Percentage of Work Completed

This Quarter

1%

**Total Project Expenses** 

This Quarter

\$7,987.02

## **Project Description:**

- Literature Review: Damage detection and load rating algorithms
- Literature Review: Techniques for assessing remaining service life
- Interim Report
- Development of real-time, strain-based algorithm(s)
- Development of real-time, vibration-based algorithm(s)
- Development of real-time, fused-data algorithm(s)
- Compare and contrast result(s) from Tasks 4 through 6
- Interim Report
- Development of Statistical Models to Extrapolate Time-dependent Load Ratings
- Development of Structural Models to Quantify Extrapolations
- Final Report

## Progress this Quarter (includes meetings, work plan status, contract status, significant progress, etc.):

A meeting with the TAC was held on 9/24/2013. During the very productive meeting, we described the significant progress that has been made on programming various aspects of the damage detection algorithm and on the truck detection algorithm. The efficacy of the algorithm was tested by running several controlled and semi-controlled tests.

We anticipate that Phase II is approximately 4 months behind schedule.

## Anticipated work next quarter:

We will work on completing the Phase II plan. This will include working to study the damage detection capabilities (specifically true and false-positives). Further, we have started working on two new topics – which relate more to Phase II. For example we have started studying how to estimate Capacity and Remaining life. This has just begun.

#### Significant Results:

Circumstance affecting project or budget (Describe any challenges encountered or anticipated that might affect the completion of the project within the time, scope, and fiscal constraints set forth in the agreement, along with recommended solutions to those problems).

None.
