TRANSPORTATION POOLED FUND PROGRAM
QUARTERLY PROGRESS REPORT

Lead Agency (FHWA or State DOT): Nevada Department of Transportation

INSTRUCTIONS:
Project Managers and/or research project investigators should complete a quarterly progress report for each calendar quarter during which the projects are active. Please provide a project schedule status of the research activities tied to each task that is defined in the proposal; a percentage completion of each task; a concise discussion (2 or 3 sentences) of the current status, including accomplishments and problems encountered, if any. List all tasks, even if no work was done during this period.

| 14 | 14 | 25% |

TPF Program Standard Quarterly Reporting Format – 7/2011
**Project Description:**

The *Wildlife Vehicle Collision (WVC) Reduction and Habitat Connectivity* pooled fund study is a collaborative research project through the Transportation Pooled Fund Program. Partners from both the United States and Canada have come together with a common interest in reducing WVC’s for the safety of humans and wildlife, as well as restoring habitat connectivity in landscapes fragmented by roadways. Contributing partners currently include Alaska DOT, Arizona DOT, California DOT, Iowa DOT, Minnesota DOT, Nevada DOT, Ontario Ministry of Transportation, Oregon DOT, and Washington DOT.

This pooled fund study (PFS) will seek to identify solutions that integrate highway safety and mobility with wildlife conservation and habitat connectivity. The Project: Strategic Integration of Wildlife Mitigation into Transportation Procedures is conducted under Principal Investigator Patricia Cramer and is reported on in this progress report.

Within U.S. states and Canadian provinces, there are few standardized planning processes for considering wildlife in transportation planning, or Best Management Practices (BMP) manuals to instruct personnel at every level how to consider, plan, design, construct, and maintain transportation infrastructure that permits connectivity for wild and domestic animals that could become involved in WVC. This study investigates and makes recommendations on successful procedures that consider and create mitigation solutions to reduce WVC and provide connectivity for wildlife to assist transportation agencies in developing standards at every level.

**Progress this Quarter (includes meetings, work plan status, contract status, significant progress, etc.):**

The team worked on the development and implementation of the US and Canadian surveys for Dept.'s of Transportation in the U.S., Ministries of Transportation in Canada, and Metropolitan Planning Organizations (MPO) in the U.S. The survey was launched August 26 for Transportation Agencies, and August 29 for MPO’s. The survey closed October 4th. Results have been summarized and a summary report will be sent to Technical Panel (A.i.a). The Literature search was also completed (A.i.c).

**Anticipated work next quarter:**

The team will work to complete Task 1 and its sub-tasks. This includes 10 state case studies, (A.i.b), list and compare methods (A.i.d), Identify pros and cons of efforts (A.i.e), Identify Gaps in the science and practice (A.i.f), and Identify how others can be brought into practices (A.i.g). We will also work on task Aii, the description of Successful Partnerships, and task Aiii, Data requirements. These will be delivered in an annual report for 2019.

**Significant Results:**

The US-Canadian on-line survey is completed, and researchers are finishing up results analyses.

**Circumstance affecting project or budget. (Please describe any challenges encountered or anticipated that might affect the completion of the project within the time, scope and fiscal constraints set forth in the agreement, along with recommended solutions to those problems):**

The budget is very constrained for the tasks in this work. The team will strive to complete all deliverables within the budget and time frame set forth in the contract.

**Potential Implementation:**
The information generated from this work will be available for U.S. DOT's and Canadian MoT's for assistance in incorporating wildlife concerns into transportation processes. It may also be used in the development of the forthcoming U.S. Transportation Act.

**Project Description:**

Passive use value report revised, waiting for last few formatting issues

Research suggestions submitted

Additional info research suggestions provided

**Progress this Quarter (includes meetings, work plan status, contract status, significant progress, etc.):**

See above
**Anticipated work next quarter:**

Address last few formatting issues passive use value report, make final report.
Address comments literature review, create final report.
Continue with updated values cost-benefit analyses.

Discuss the selection of research modules with Nova
Initiate the selected research modules, partnership agreements, organize.

**Significant Results:**
Draft literature review, submitted
Passive use values for select species for cost-benefit analyses almost done, except for a few formatting issues
Presented preliminary data updated values cost-benefit analyses on 17 June 2019
Circumstance affecting project or budget. (Please describe any challenges encountered or anticipated that might affect the completion of the project within the time, scope and fiscal constraints set forth in the agreement, along with recommended solutions to those problems).

None

Potential Implementation:

None
