

Quarterly Report: January – March 2008

TPF-5(158): FHWA Traffic Noise Model: Version 3.0 Software Development

After a recent meeting with the Volpe Center, we are shooting to have our second meeting with a demo of the items you have all decided to fund at the ADC40 Summer Meeting in Key West (July 20-23, 2008). This meeting and demo would be for the TAC of the pooled fund only. It is not envisioned to be open to all participants, unless you feel strongly that it should. These are your items that you are funding; therefore we want you to have ownership of them. It is also not envisioned that these items will be completed by this meeting. We want to finalize the development after your input. So, please respond with your thoughts on having our second meeting during the ADC40 summer meeting. As we did last year – we would like to do this without providing any travel funds out of the pooled fund pot.
