

## TRANSPORTATION POOLED FUND PROGRAM QUARTERLY PROGRESS REPORT

Lead Agency (FHWA or State DOT): NDDOT

### INSTRUCTIONS:

*Project Managers and/or research project investigators should complete a quarterly progress report for each calendar quarter during which the projects are active. Please provide a project schedule status of the research activities tied to each task that is defined in the proposal; a percentage completion of each task; a concise discussion (2 or 3 sentences) of the current status, including accomplishments and problems encountered, if any. List all tasks, even if no work was done during this period.*

☒ On schedule
 ☐ On revised schedule
 ☐ Ahead of schedule
 ☐ Behind schedule

Overall Project Statistics:

Total Project Budget	Total Cost to Date for Project	Percentage of Work Completed to Date
		NA

Quarterly Project Statistics:

Total Project Expenses and Percentage This Quarter	Total Amount of Funds Expended This Quarter	Total Percentage of Time Used to Date
	\$139,634.47	NA

**Project Description:**

The Transportation Learning Network (TLN) was developed to serve the transportation interests of the region and complements the efforts of its various members. It provides access to information and expertise not readily available to transportation professionals in the region. TLN identifies schedules, distributes and warehouses technology transfer for its member state DOTs.

**Vision:** To excel on a national basis as a premier transportation technology transfer organization that serves as a model for other states.

**Mission:** TLN provides quality and cost-effective customer-driven technology transfer utilizing alternative platforms that meet the needs of the state, county, city, tribal and private transportation professionals.

Staff develop a list of technology transfer presentations based on priorities determined by the 4-state members of the Transportation Learning Network; topics are researched, descriptions written, presenters identified, negotiate presenter contracts and schedule presentations.

There are monthly meetings of the programming committee consisting of members from the 4-state DOTs and an MPC representative. The committee approves identified topics and TLN staff move forward with announcing the events and putting into place a registration process. An evaluation link is provided to all participants.

The majority of presentations occur between October and April due to the construction season in the 4-states served by this program. During summer months, the staff and program committee members identify and prioritize technology transfer topics. Self-paced modules and previously recorded sessions are available on the learning management system.

In continued response to the remote work environment, the Transportation Learning Network delivers technology transfer topics via webinars. Individuals are able to receive these very important topics via their computers, tablets and phones.

During this reporting period, there were 5 webinars presented with a total attendance of 486. Topics included:

About ADA & ABA PROWAG

Modern Asphalt Paving Equipment and Technologies

Aggregate Roundtable Conversation

Pavement Preservation Practices for the Urban Environment & Best Practices with RAP

MPC Research: Learning from the Travel Experiences of Persons with Disabilities: Investigating

In addition to live presentations, over 140 online modules and over 245 recorded presentations were completed.

TLN records the majority of live sessions and creates self-paced modules. Members can then re-watch or launch it as a new session on demand. There are over 200 currently available.

AASHTO provides TLN with approximately 250 self-paced modules that are uploaded on the TLN learning management system.

In May 2024, the TLN Executive Committee held their annual in-person meeting in Rapid City, SD. There was representation from all four TLN participating states, as well as TLN staff. Staff reported on the year's offerings and attendance, discussed future needs and approved a budget for July 2024 – June 2025. A scope of work and budget has been processed through North Dakota State University and the North Dakota Department of Transportation (project lead state).

**Significant Results:**

Identifying and delivering technology transfer needs of the DOTs in Montana, North Dakota, South Dakota and Wyoming. Live presentations are broadcast as webinars. The majority of these presentations are recorded and available for playback on the TLN learning management system. Along with the recordings, there are self-paced modules available 24/7. This program can reach many individuals to bring significant opportunities to increase knowledge without the need to travel great distances.

**Circumstance affecting project or budget. (Please describe any challenges encountered or anticipated that might affect the completion of the project within the time, scope and fiscal constraints set forth in the agreement, along with recommended solutions to those problems).** -- None encountered.
