

## TRANSPORTATION POOLED FUND PROGRAM QUARTERLY PROGRESS REPORT

Lead Agency (FHWA or State DOT): \_\_\_\_\_ FHWA \_\_\_\_\_

**INSTRUCTIONS:**

Lead Agency contacts should complete a quarterly progress report for each calendar quarter during which the projects are active. Please provide a project schedule status of the research activities tied to each task that is defined in the proposal; a percentage completion of each task; a concise discussion (2 or 3 sentences) of the current status, including accomplishments and problems encountered, if any. List all tasks, even if no work was done during this period.

Ongoing project (N/A)	Ongoing project (N/A)	Ongoing project (N/A)

**Project Description:**

The primary goal of the Evaluation of Low-Cost Safety Improvement Pool Fund Study (ELCSI-PFS) was to save lives and reduce traffic crash injuries by identifying effective safety strategies for national implementation. The ELCSI-PFS conducted research to quantify the safety effectiveness of selected strategies — so-called crash modification factors (CMFs) — that may address priority safety concerns but had not been proven. This study also provided benefit-cost (B/C) ratios to estimate the resulting relationship between the relative monetary value of benefits and costs of a selected strategy. Transportation agencies utilized estimated CMFs and B/C ratios to select, plan, fund, and install a specific safety strategy on a targeted site to improve its outstanding safety issue. The secondary goal of this study is to improve and advance the statistical tools to conduct more reliable, rigorous research. For this effort, this study collaborated with the American Statistical Association (ASA) and identified new statistical methodologies to advance the current practices

used in the development of CMFs. This study initiated in 2005 but continued adding years for additional studies. Currently this study is running Phase XIV (so-called 3 CMFs) to evaluate the safety effectiveness of the following countermeasures:

- Curb Extensions (CE)
- Wide Width Pavement Markings (WWPM)
- Narrow Width Rumble Strips (NWRS)

**Progress this Quarter (includes meetings, work plan status, contract status, significant progress, etc.):**

ELCSI-PFS PHASE XIV: 3 CMFS

- Held a quarterly progress meeting on January 14, 2026, with FHWA subject matter experts to identify potential issues related to Manual on Uniform Traffic Control Devices (MUTCD) compliance and implementation and accessibility.
- Began drafting a memorandum summarizing data collection efforts and anticipated statistical methodologies.
- Continued data collection by outreach to agencies and quality check on the collected data for each topic.

TECHNICAL ADVISORY COMMITTEE (TAC) MEETING

- Drafted the agenda for the 2026 TAC meeting and distributed it among partner states.
- Continued recruitment of TAC meeting speakers.
- Coordinated with shortlist of meeting venues and continued planning travel logistics: the meeting will be held in the District Department of Transportation Conference Room on June 15<sup>th</sup> and 16<sup>th</sup>.

PUBLICATIONS

None

**Anticipated work next quarter:**

- Complete data collections for all three studies and continue data review and assessment.
- Conduct a quarterly meeting.
- Complete a memorandum summarizing data collection efforts results and anticipated statistical methodologies.
- Finalize TAC meeting logistics (i.e., hotel accommodations, air tickets, registration, etc.).
- Conduct the 2026 TAC meeting.

**Significant Results:**

- Made progress on data collection and determined the 2026 TAC meeting dates and venue.

**Circumstance affecting project or budget. (Please describe any challenges encountered or anticipated that might affect the completion of the project within the time, scope and fiscal constraints set forth in the agreement, along with recommended solutions to those problems).**

The project schedule may be delayed due to challenges in collecting data from sites where MUTCD-compliance countermeasures are installed.

**Potential Implementation:**

N/A
