Progress this Quarter (includes meetings, work plan status, contract status, significant progress, etc.):

05-5 (FHWA): Measurement of Adhesion Properties Between Topcoat Paint and Metallized/Galvanized Steel with Surface Energy Measurement Equipment

- Final Report was reviewed by Technical Committee and the NETC Coordinator.

Anticipated work next quarter:

05-5 (FHWA): Final Report editing in preparation for printing Final Report for distribution; and then FHWA CT can recommend the final invoice for payment to the FHWA HQ CO, and close project out.

Significant Results:

NETC 05-5 is very close to being completed.

Circumstance affecting project or budget. (Please describe any challenges encountered or anticipated that might affect the completion of the project within the time, scope and fiscal constraints set forth in the agreement, along with recommended solutions to those problems).

The PI is taking an exorbitant amount of time to complete the draft and final reports for review and publication.

Potential Implementation:

Additional webinars to broadcast research results and products by the TMC pooled fund study will be arranged and rolled out on a quarterly basis.
