# TRANSPORTATION POOLED FUND PROGRAM QUARTERLY PROGRESS REPORT

Lead Agency (FHWA or State DOT): <u>IOWA DOT</u>			
INSTRUCTIONS: Project Managers and/or research project invequarter during which the projects are active. It each task that is defined in the proposal; a pethe current status, including accomplishments during this period.	Please provide rcentage comp	a project schedule stat pletion of each task; a co	us of the research activities tied to oncise discussion (2 or 3 sentences) of
Transportation Pooled Fund Program Project # TPF-5(219)		Transportation Pooled Fund Program - Report Period:	
		□Quarter 1 (January 1 – March 31)	
		X Quarter 2 (April 1 – June 30)	
		□Quarter 3 (July 1 – September 30)	
		□Quarter 4 (October 4 – December 31)	
Project Title: Development of a Structural Health Monitoring System to Evaluate Structural Capacity and Estimate Remaining Service Life for Bridges

Project Investigator: Brent Phares	<b>Phone: E-ma</b> 515-294-5879 bphar		il: es@iastate.edu
Lead Agency Project ID: RT 329	Other Project ID (i.e., contract #): Addendum 367		Project Start Date: 3/01/10
Original Project End Date: 2/28/15	Current Project End Date:		Number of Extensions:
Project schedule status:			
X On schedule ☐ On revised sched	lule   Ahead of schedule   Behind schedule		
Overall Project Statistics:			
Total Project Budget	Total Cost to Date for Project		Total Percentage of Work Completed
\$500,000.00	\$62,140.62		15%
Quarterly Project Statistics:			
Total Project Expenses This Quarter	Total Amount of Funds Expended This Quarter		Percentage of Work Completed This Quarter

## **Project Description:**

- Literature Review: Damage detection and load rating algorithms
- Literature Review: Techniques for assessing remaining service life
- Interim Report
- Development of real-time, strain-based algorithm(s)
- Development of real-time, vibration-based algorithm(s)
- Development of real-time, fused-data algorithm(s)
- Compare and contrast result(s) from Tasks 4 through 6
- Interim Report
- Development of Statistical Models to Extrapolate Time-dependent Load Ratings
- Development of Structural Models to Quantify Extrapolations
- Final Report

# Progress this Quarter (includes meetings, work plan status, contract status, significant progress, etc.):

We have finalized a draft interim report and presented it to the TAC. A Phase II scoping plan is being developed and should be finalized shortly. Work continues on preliminary algorithm development.

#### Anticipated work next quarter:

We will submit the scoping plan to the TAC for approval. If approved we will begin the execution of the proposed effort. Special attention will be given towards gaining a better understanding of the specific algorithms proposed for potential advancement.1

## Significant Results:

We have found that there are relatively few modal-based algorithms that have been field validated. However, those that have show some interesting promise. Also, our technique for determining load ratings from random, unknown vehicles appears to be working well.

Circumstance affecting project or budget (Describe any challenges encountered or anticipated that might affect the completion of the project within the time, scope, and fiscal constraints set forth in the agreement, along with recommended solutions to those problems).

None.
